Traverse the linked list pointed to by `head`, outputting each `value` in turn. A linked list is terminated with `-1` in the next field.
(Hint: there are not necessarily 7 elements in the linked list).

Note also: the array is an array of objects, each object contains `value` field and `next` field.

head | 3 |

	0	1	2	3	4	5	6
value	10	20	30	40	50	60	70
next	1	-1	1	2	3	5	-1
